```java
import java.util.Scanner;
public class Main
{
    public static void main(String[] args) {
        Scanner tendy = new Scanner(System.in);
        System.out.print("Enter the marks of the student: ");
        int marks = tendy.nextInt();
        tendy.close();

        if (marks >= 80) {
            System.out.println("Level 7 - Outstanding Achievement");
        } else if (marks >= 70) {
            System.out.println("Level 6 - Excellent Achievement");
        } else if (marks >= 60) {
            System.out.println("Level 5 - Good Achievement");
        } else if (marks >= 50) {
            System.out.println("Level 4 - Fair Achievement");
        } else if (marks >= 40) {
            System.out.println("Level 3 - Pass");
        }else if (marks >= 30) {
            System.out.println("Level 2 - Fair Achievement");
        }
        else {
            System.out.println("Level 1 - Fail");
        }
    }
```
